REASONS FOR YOU TO BECOME A MEMBER OF THE ISWA

Representation **1**

The Idaho Solid Waste Association's (ISWA) mission is to connect and help Idaho's solid waste industry professionals stay ahead of the curve in every aspect of our fast paced field.

The ISWA Board of Directors represents the entire state which is divided into five districts. From each district, both public and private sectors are represented with one seat on the Board.

Networking **2**

We provide education and networking opportunities to Idaho's solid waste professionals in every facet of the industry, benefiting individual members while also furthering the work of our profession.

Through our events, we create opportunities to interact with other waste professionals throughout Idaho. Our members value the opportunity to learn from one another—from challenges faced to innovations deployed.

Facility Tours **3**

ISWA believes that touring facilities provides members with a comprehensive understanding of Idaho's integrated solid waste facilities by experiencing it up close and personal. Idaho offers a variety of solid waste management facilities serving their respective districts, counties, and cities. From landfills to composting operations, our facility tours are popular and well-attended events.

Training and Education **4**

The ISWA offers dynamic and diverse educational opportunities for solid waste professionals in both the public and private sectors. Our biannual conferences are rotated around the state, thereby leveling the cost of travel and lodging for our members. Participants can earn CEUs when attending our training and educational offerings. We focus on the latest trends, technologies, and management topics to help you make informed business decisions.
