
Quitting for Diapers

If you're pregnant or have an infant and you smoke, the best thing for your health and the health of your baby is to try your best to quit.

Contact Timalee Geisler at 208-533-3149 to learn about the program.

If you decide to participate in the program, you will be required to prove you are tobacco free by passing a nicotine breathalyzer test. This is a simple test, administered in the office, with immediate results.

If you pass the test, you will receive 1 package of diapers and 1 package of wipes at that visit. You are eligible for breathalyzer testing two times per month.

If you don't pass, you can reschedule with Timalee to be tested again within 48 hours can continue to be tested until you are nicotine free.

This program is offered as long as funding is available, currently through March 30, 2019.
