## COVID-19 Daily Report Monday, April 6, 2020

### Positive COVID-19 Test Results

**Case #24:** We are reporting a positive COVID-19 test result for a male in his 30s in **Bonneville County**. This individual was not hospitalized and is recovering at home. The case has no recent travel history or contact with a confirmed COVID-19 case. Therefore, community spread of COVID-19 is identified.

Epidemiologists with EIPH are investigating the case. If other people are found to be exposed, health officials will contact them, provide them guidance, and monitor them closely for symptoms. Additional case-specific information about these individuals is confidential and will not be released.

### COVID-19 Case Counts/County

County	Cases
Bonneville*	7
Clark	0
Custer	2
Fremont	2
Jefferson*	4
Lemhi	0
Madison*	4
Teton*	5
<b>Total</b>	<b>24</b>

\*Indicates community transmission of COVID-19.

### COVID-19 Q & A of the Day

**Question:** Are Stay at Home Orders an overreaction to this situation?

**Answer:** Three out of four Americans are now under some sort of Stay at Home order or lockdown from their state or local authorities. For many of them, the best thing they can do right now is be patient. There may be a lag of a few weeks before these difficult measures are reflected in new case and death data. Right now, many people are still getting sick and requiring hospitalization, who were infected before these orders went into effect. This means many cities and regions are still seeing the early part of the wave of cases hitting their health care systems. All of this is reason to stay at home as much as possible and keep social distancing, along with doing all the other recommendations that have been provided over the past several months. Doing these things can dramatically slow the spread of COVID-19.
