EMPLOYEE / INDIVIDUAL

*SYMPTOMS MAY APPEAR 2-14 DAYS AFTER EXPOSURE TO THE VIRUS AND INCLUDE:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This document is a general guideline to assist with decision making. Please refer to Eastern Idaho Public Health or your healthcare provider for questions that are specific to your individual circumstance.

Seek the evaluation of a medical provider to determine if COVID-19 testing is indicated.

If testing is indicated, please ISOLATE until test results are received.

If test result is POSITIVE, continue to ISOLATE and local public health will contact you for follow up.

If no testing is conducted, you should ISOLATE for at least 10 days after symptom onset AND symptoms have improved, including being fever-free for 24 hours without the use of fever-reducing medications before returning to normal daily activities.

Health Monitoring for Respiratory Illness

It has always been important to keep an eye on your health. Use this as a guide to monitor yourself for symptoms if you believe you've been exposed to a respiratory illness. Take your temperature twice a day, in the morning and in the evening, and write it down. Mark if you have any of the listed symptoms: circle 'Y' for Yes and 'N' for No. Pay special attention if you have a fever (100.4° F or higher), cough, or shortness of breath. If you experience fever, cough, or shortness of breath please remain self-isolated until your fever is gone, other symptoms have improved for 3 days, and it's been at least 10 days since symptoms appeared. **If you feel your symptoms are serious, call your healthcare provider.**
